

Inventory::findBookByISBN

Inventory::isBookAvailable

LibraryHash::ISBNToHash

```
graph LR; A[Inventory::findBookByISBN] --> C[LibraryHash::ISBNToHash]; B[Inventory::isBookAvailable] --> C;
```

The diagram illustrates a dependency or reuse relationship. Two methods from the `Inventory` class, `findBookByISBN` and `isBookAvailable`, are shown in white boxes on the left. Two blue arrows point from these boxes to a single gray box on the right, which contains the method `LibraryHash::ISBNToHash`. This indicates that both `findBookByISBN` and `isBookAvailable` rely on the `ISBNToHash` method from the `LibraryHash` class.
